BUFFALO WATERFRONT RESTAURANT

Erie Basin Marina, Buffalo, New York

HHL designed this speculative waterfront restaurant and banquet facility to replace the former “Crawdaddy’s” restaurant, which was demolished. The project was not built.

The design incorporated a series of balconies and decks which cascaded toward the waters edge, to maximize views and the experience of being next to the water and within a city.

The ground floor was the public 300 to 400-seat restaurant, with exterior dining decks. The upper floors were design for 300-400 seat capacity banquet and private party use.

The design included public access to the waters edge, but foot or boat, along the ground level deck.

- Project Size:* 23,900 sf
