RICHARD WINTER STUDENT CENTER RENOVATIONS CANISIUS COLLEGE

Buffalo, New York

Hamilton Houston Lownie Architects developed an adaptive reuse design to the former second floor Auditorium, converting it into much needed Student Club Rooms, student lounge and multi-purpose meeting/banquet facilities for students, faculty, and the public. The lower level houses the main student club and student lounge spaces.

Also included in the project was the modernization of the elevators, including the replacement of both passenger and freight elevators. A new passenger elevator was designed to provide improved access from the basement (tunnel) level to the second floor. The new

freight elevator was extended to provide food service access from the ground floor kitchen to the newly created second floor banquet space, as well as the existing Fireside Lounge.

Project Size: 11,000 sf

Project Cost: \$1,500,000

Complete: 1998

Client: Canisius College
